The
LIGHTING
AUTHORITY®

The Illuminating Engineering Society of North America is the recognized technical authority on illumination. The strength of the IESNA is its diversified membership — engineers, architects, designers, educators, students, contractors, distributors, utility personnel, manufacturers, and scientists. The society publishes nearly 100 authoritative publications, including recommended practices on a variety of applications, design guides, technical memoranda, and publications on energy management and lighting measurement. And, all IESNA publications are available to members at a 30% discount. IESNA also publishes Lighting Design + Application (LD+A). Sent to members free of charge, LD+A is a popular applications-oriented monthly magazine that features news of practical and innovative lighting layouts, systems, equipment and economics, and of the industry and more.
